ADIA is an approved PACE Program Provider
FAGD/MAGD Credit. Approval does not imply
acceptance by a state or provincial board of
dentistry or AGD endorsement. The approval
period extends from 9/1/2015 to 8/31/2017.
Provider ID# 355116
The Toronto Implant Academy would like to express its appreciation to our loyal sponsors for their ongoing support and generosity. Our sponsors allow TIA to offer you a world class program of unprecedented value every year.
Mastering extraction and socket preservation

Dental implant placement is a highly demanding surgical procedure. It is all made easier with proper handling of tooth extraction and socket preservation. In this course we will explore current tooth extraction techniques that are minimally invasive and simple to achieve as well as evidence based socket preservation and grafting that will enable you to handle and prepare an edentulous site for implant placement. Some time will also be spent on discussing immediate implant placement as a way to preserve osseous and soft tissue architecture after extraction.

Dan Hagi, DDS, FAGD, FICOI,(A)FAAID - Educated at the University of Toronto Faculty of Dentistry, Dr. Hagi has a focus for minimally invasive aesthetic dentistry and metal-free oral implant rehabilitation. Dr. Hagi has current memberships with the International Congress of Oral Implantology, American Academy of Implant Dentistry, Academy of General Dentistry, American Academy of Cosmetic Dentistry and the International Academy of Dentofacial Aesthetics among others. The Thornhill Smile Centre, Dr. Hagi's private practice, is located in Thornhill, ON and is a Leading Dental Centre of the World (LDCW). Along with the Centre of Excellence in Implant Dentistry (CEIT), the education centre, Dr. Hagi brings excellence in dental care and dental continuing education. Dr. Hagi is an international lecturer, author and consultant to several dental manufacturers.

Marketing Dental Implants; Increasing Case Acceptance Strategies

One of the barriers to case acceptance in implant dentistry is still dealing with the associated higher fees unexpected by our patients and minimal coverage by their insurance carriers. Although clinicians have the knowledge base to provide optimal implant dentistry treatment, they are often frustrated with lack of patient acceptance and compliance. This presentation will teach dentists various techniques to improve their case acceptance rates for implant dentistry. In addition, optimal patient education tools will be illustrated to aid in case acceptance rate.

Wajahat Khan, B.Sc., DDS, MBA, M.Ed., FICOI, FPFA - grew up in Scarborough, Ontario. After graduating from high school he attended the University of Toronto, Trinity College and graduated with a Bachelor of Science with High Distinction in 1997. He then attended The University of Toronto Faculty of Dentistry and graduated with his Doctor of Dental Surgery in 2001. Dr. Khan served as a dental officer in the Canadian Forces from 1998-2007. Dr. Khan began practicing dentistry in Halifax, Nova Scotia with the Canadian Forces. In the CF he learned a lot through mentorship with dental specialists and advanced dental training courses. After a ten year career in the Canadian Forces, he then moved to Kingston with his wife and life partner Dr. Sohela Vaid.

He is a current and past member of; both the Canadian and Ontario Dental Associations, the Canadian and Ontario Medical Associations, the American Academy of Implant Dentistry, the International Congress of Oral Implantology, the American Academy of Cosmetic Dentistry, the Nova Scotia Dental Association, the Kingston and District Dental Society, the Halifax County Dental Society, Xi Psi Phi Dental Fraternity, United States Army Medical Department Regiment,

Dr. Khan enjoys working in all areas of dentistry with a particular interest in cosmetic/esthetic, implant, sedation, restorative, orthodontic and surgical dentistry to improve oral health and boost confidence. He also is committed to his profession through his current and past work in; dental research, dental education as a clinical instructor to dental students at Dalhousie University and the University of Toronto Faculty of Dentistry, and as a lecturer both Nationally and Internationally. He is dedicated to providing oral health care in a comfortable and welcoming environment.

**CRA Bleeding You Dry? Tax-Efficient Strategies to Help Stop the Flow**

Every practice has the same "silent partner" that does not contribute to the success of the business, but still takes, takes, takes from the business nonetheless - the CRA. This presentation will introduce increasingly popular concepts that professional corporations can and should be taking advantage of. Strategies we will explore include tax-free retirement income and maximising the after-tax value of your corporate assets for your heirs.

**Wan Ying (Kelly) Kwun, B.A.Sc., CFA** is an advisor at Sun Life Financial. She earned her Bachelor of Applied Science degree at the University of Toronto. She had worked in the capital markets sector on the buy side for 16 years before entering the insurance industry 2 years ago after becoming fascinated with the power and potential that the right insurance strategy can offer. Kelly helps individuals, professional corporations, and business owners achieve piece of mind through a thoughtful and disciplined approach for each strategy she implements. Kelly earned her Chartered Financial Analyst (CFA) designation in 2006.

Sun Life Financial has been protecting Canadians for over 150 years and is a well-known and highly trusted financial services institution.

CBCT Guided Full Arch Immediate Reconstruction: from Surgery to Prosthetics

This new technique for guided reconstruction has not only changed, but also will continue to change the way we plan and treat implant patients going into the future. This lecture will discuss how we can now use digital technology to integrate the surgical, restorative, and laboratory disciplines, in order to have a much more accurate, efficient and seamless result in immediate implant reconstruction.

Dr. Allen Aptekar, B.Sc., DMD studied at the University of Toronto, earning his Bachelors of Science degree in Biology. He received his Doctor of Dental Medicine degree with distinction at the University of Saskatchewan College Of Dentistry. Dr. Aptekar then completed a one year hospital residency at Sunnybrook Health Sciences Center and the University of Toronto. He has authored and co-authored several articles in refereed professional dental journals, and is a lecturer in dental implant procedures for dentists and denturists. He practices in the greater Toronto area, with a special interest and focus on dental implantology.

Zygoma Implants and Immediate Load Rehabilitation of the Maxilla

The All-on-4 treatment concept by Nobel Biocare allows for rehabilitation of either the maxilla or mandible with just four dental implants. This treatment concept allows for immediate load fixed rehabilitation of either arch. The maxilla is more challenging due to the presence of the maxillary sinuses. Not all cases may be treated with standard implants in the All-on-4 treatment concept. Even with the tilted implant concept, spread is often limited by the anterior position of the maxillary sinuses. This presentation will discuss the unique Zygoma implant and its use in the All-on-4 immediate-load treatment concept. The presentation will outline the clinical situations when the Zygoma implant is required for maxillary, fixed-immediate-load implant rehabilitation. The various considerations involved with the Zygoma implant treatment planning will be discussed from surgical to prosthetic issues. Complications associated with this type of implant will also be reviewed.

Dr. Lorenzo Vigna graduated with Honors from the University Of Toronto Faculty Of Dentistry. After completing dental school Dr. Vigna completed a one year dental internship at the Toronto General Hospital from 1990-1991. At that time he treated medically compromised patients at the dental clinic and was exposed to the oral surgery program at the University. This created interest in oral surgery and subsequently encouraged him to apply to the oral surgery programs throughout the United States.

In 1995 following oral surgery residency Dr. Vigna took his fellowship exams and obtained his Royal College of Dental Surgery fellowship with the Canadian Board. Dr. Vigna is the new Chief of Oral and Maxillofacial Surgery for the Niagara Health System. He is also the Service Lead for Dental Service with the Department of Surgery at the Niagara Health System. Dr. Vigna is an Assistant Clinical Professor of Surgery with McMaster University and teaches Ear, Nose and Throat residents in both his clinic and hospital.

Iatrogenic Endodontics

Iatrogenic Endodontics, what to watch out for in order to minimize your endodontic misadventures. Avoiding pitfalls and reducing complications.

Dr. Rony E. Dagher, B.Sc., DDS, M.Sc (Endo), FRCD(C) is an Endodontist and a fellow with royal college of Dentist of Canada who maintains a private practice in Mississauga Ontario Canada.

He is a graduate from university of Toronto with a Bachelor of Science degree. He attended Case Western Reserve University where he graduated with a DDS.

He attended Toronto General Hospital surgical residency program and practiced general dentistry for 7 years prior to enrolling and completing a specialty master’s degree in endodontics at the University of Toronto Dr. Dagher has served as an instructor at both the undergraduate and graduate endodontic department at the University of Toronto. He is currently on the board of endodontic examiners for the Royal College of Dentist of Canada.

Dr. Dagher holds special interest in Dental Traumatology and regenerative endodontics. He currently lectures on many endodontic topics including rotaries, trauma, disinfection and regeneration. He is current a member of numerous endodontic and dental associations and societies.

Dental Implants: The Good, The Bad and The Ugly

Dental implants have the potential to rehabilitate the dentition of our patients and provide excellent service for a life-time. It is important to recognize that while implants have had a revolutionary effect on modern dentistry, they do pose a challenge when it comes to long-term care and management. With the growth in the number of dental implants placed annually, by greater numbers of practitioners of varying experience, using more types of implant systems, and ever-increasing pressure to reduce costs, it is our responsibility to prepare ourselves for the tsunami of aging implants and the difficulties we will face managing them.

Dr. Edy Braun, Hon. B.Sc., DDS, Cert. Perio, FRCD (C) is a periodontist who earned his B.Sc. and DDS from the University of Toronto (2001). After general practice residencies and a periodontal program in the USA, Dr. Braun became board certified by the Royal College of Dentists of Canada in 2007. He currently practices at his periodontics specialty office in Vaughan.

What Sleep Physicians (and Dentists) Need to Know About Oral Appliance Therapy for Treatment of Obstructive Sleep Apnea

Patients often go to their dentists for advice about oral appliance therapy for sleep apnea. For the practitioners, either medical or dental, who choose NOT to treat this condition, it is still important that they have enough knowledge of this treatment modality to advise their patients. This presentation will provide needed information and correct common misconceptions.
Dr. Les Priemer graduated from the University of Toronto, faculty of Dentistry in 1972. He is a member of the American Academy of Dental sleep Medicine, (having served on its Education and Curriculum committee) and is an Emeritus member of the American Academy of Sleep Medicine. He is a Diplomate of the American Board of Dental sleep Medicine and sat on its certification committee in 2003-2004. He consults with a number of sleep diagnostic centres and has given numbers presentations to sleep and general hospital rounds, physicians, respiratory technicians and dentists. He has presented to the Ontario Dental Association Spring Meeting and has authored articles on sleep disordered breathing for the Ontario Dental Association Journal and the Canadian Dental Protection Association. He is also currently an instructor for the University of Toronto Sleep Medicine Program.

Succeed with Mini Dental Implants: Denture Stabilizations Procedures in One Hour! A Valuable Service to Your Patients and Your Practice!

The technique in using mini dental implants for denture stabilizations are easily mastered and are quite gratifying for the patient and the dental professionals. Dentists who use mini dental implants can experience a renewed enthusiasm for dentistry, improved their patients’ lives and built their practice earnings.

Todd E. Shatkin, D.D.S., has placed more than 18,000 mini dental implants and trained over 20,000 dentists worldwide over the past sixteen years. He has utilized mini dental implants for denture stabilizations, single and multiple tooth replacements and for full arch reconstructions, with a success rate of 95%.

Dr. Shatkin’s seminal article “Mini Dental Implants for Long Term Fixed and Removable Prosthetics” was published in the Journal Compendium of Continuing Education in Dentistry February, 2007 Issue pp 92-100 and has been well received. His follow up article “Mini Dental Implants: A Retrospective Analysis of 5640 Implants Placed Over a 12-Year Period” was published in the Journal Compendium of Continuing Education in Dentistry, September, 2012, Volume 33, Special Issue 3.

Dr. Shatkin is a graduate of the University of the Pacific School of Dentistry. He is the President Emeritus of the International Academy of Mini Dental Implants and the owner of Shatkin F.I.R.S.T., LLC, a mini dental implant specialty laboratory. Dr. Shatkin is well respected as a world leader on mini dental implants. Most recently, he has presented live mini dental implant placement procedures at the 2016 America Dental Association Annual Meeting and the 2017 Chicago Dental Society Mid-Winter Meeting. Dr. Shatkin is in private practice in Amherst, New York.

Update in Implant Dentistry

Surgical techniques:
- Risk factors
- Complications
- Immediate implants
- Short and Narrow implants
- Bone augmentation

Prosthetic techniques:
- Misadventures
- Full arch restoration
- Cantilevers
- Screw vs Cement
- Digital technology

Dr. Murray Arlin, D.D.S., dip Perio, F.R.C.D.(C) received his D.D.S. from McGill University in 1977. After 1 year Residency in General Dentistry at the Jewish General Hospital in Montreal, he began his Post-Graduate Program in Periodontics at the University of Toronto, graduating in 1980. Dr. Arlin received his Membership and Fellowship in the Royal College of Dentists of Canada in 1981 and 1983 respectively.

Dr. Mark Nicolucci graduated from the University of Western Ontario Dental School, then attended a residency program at Temple University in Philadelphia. In 2010, Dr. Nicolucci graduated from Temple’s Periodontology program with a certificate in Periodontology and Oral Implantology. In addition, Dr. Nicolucci received a Masters in Oral Biology, became a diplomat of the International Congress of Oral Implantology, and a Fellow of the Misch International Implant Institute. Since returning to Canada he has been very active in lecturing and attending seminars both locally and internationally.

A Primer in Sleep Disorders Dentistry

Dentistry is going through a Paradigm Shift that rivals the transition from the Prophy Mill practice of the 1970’s to the Soft Tissue Management practice of the 1980’s. Prepare your office for this inevitable transition. This program will provide you everything you need to know to start implementing Sleep Disorders Dentistry (SDD) in your office tomorrow.

Learn:
- About the prevalence of snoring and sleep apnea in your practice
- How a SDD program will cultivate referrals & build your practice
- Effective screening techniques for snoring and sleep apnea
- How to discuss treatment alternatives with confidence
- About screening questionnaires and the role of your team
- Triage patients appropriately with info the physicians expect
- Basics about oral appliance therapy for snoring and sleep apnea
John Viviano DDS D,ABDSM obtained his credentials from U of T in 1983. His clinic is limited to providing conservative therapy for Sleep Disordered Breathing and Sleep Related Bruxism, commonly referred to as snoring, sleep apnea and tooth grinding. A member of various sleep organizations, he is a Credentialed Diplomate of the American Board of Dental Sleep Medicine, and has lectured internationally, conducted original research and authored articles on the management of Sleep-Disordered Breathing and the use of Acoustic Reflection to evaluate the upper airway. His clinic is the only Canadian facility accredited by the American Academy of Dental Sleep Medicine. Dr. Viviano also hosts an online LinkedIn Discussion Group with members from around the globe (SleepDisordersDentistry LinkedIn Group) and conducts Dental Sleep Medicine CE programs for various levels of experience including a 4-Day Mini Residency.

1. Rationale for site development.
2. Why, when and where?
3. Learn different modalities utilized in developing a surgical site for implants.
4. Clinical Cases

Aeklvya Panjali is a graduate from New York University. He received his post graduate training in dental implants from Germany 1992. In 2004, he continued his training in Implant Dentistry at New York University and has a Master’s Degree in Oral Implantology, Frankfurt University, Germany.

Dr Panjali is a Fellow of the Academy of General Dentistry, and Diplomat of the International Congress of Oral Implantologists. He is an active member of several dental organizations and has been lecturing on Dental Implants nationally and internationally since 1996. He has trained well over 700 dentists within the US and over a thousand dentists worldwide.

He has evaluated and lectured on several leading implant systems and presents a versatile approach in treatment planning, surgical techniques as well as providing a non-invasive conservative treatment.

He owns and operates an active private practice in Watertown, as well as in midtown Manhattan, with emphasis on Implant Dentistry.

Digitally Guided Implant Surgery: What you need to know to maximize your digital workflow

- Review of literature on Guided Implant Surgery
- Preparing the surgical site
  - Extractions and Guided Bone Regeneration (GBR)
  - Materials and membranes
  - Techniques on fresh extraction vs. healed sites

- Guided Surgery:
  - Information needed
  - Keys for InLab system
  - Scanning and CBCT integration
  - Software surgical simulation and exporting DXD file
  - Surgical guide design and fabrication of CERECGuide2 stent
  - Printing vs. milling of stent

- Implant Integration
  - Literature review of Implant integration

- Temporary Abutment Crowns to modify and shape gingival zenith
  - Using Procera wax sleeves and InLab
  - Using Ti-Base and InLab
  - Tarnow principles and creating papilla
  - Quantifying gingival modification digitally
  - Screw vs cemented implant restorations

Dr. Amarjit Rihal, DDM obtained his DMD degree from the University of Manitoba, Faculty of Dentistry, in 1995. His professional interest has involved all aspects of implant and CAD/CAM dentistry. He has additional training in both hard and soft tissue grafting as well as placing and restoring implants. In addition to implantology, Dr. Rihal has acquired expertise in CAD/CAM based prosthetic dentistry, involving numerous CAD systems and materials. Utilizing his CEREC ac, Sirona InLab system, and Nobel Procera scanner he has designed over 4000 restorations. He currently manages operations of his in house lab Lodge Dental, and is the owner of his own digital lab called Rihal Digital Designs. Dr. Rihal has trained with numerous ceramists in California and is versed on ceramic pressing and layering techniques over zirconia and metal substructures. He presently is a partner in a large group practice in Winnipeg, MB and serves on the boards of the Manitoba Dental Association (MDA), National Dental Examination Board (NDEB) and the current chair of the Commission on Dental Accreditation of Canada (CDAC). He was also a part time instructor at the University of Manitoba Faculty of Dentistry and is a fellow of the Pierre Fauchard Academy and International College of Dentist.

Complications in Implant Dentistry

Some complications may be relatively minor and easy to correct, while others will be major and result in the loss of the implant or prosthesis. Implant complications can typically be categorized by temporal sequence and defined as either an early or late complication. An early complication can be defined as a problem that arises prior to osseointegration of the dental implant, whereas a late complication occurs after the implant osseointegrates and the final prosthesis is placed. In addition, implant problems can further be subcategorized into biologic or mechanical complications. Biologic complications involve pathosis of the peri-implant hard and soft tissue. Mechanical complications occur when the fatigue strengths of the dental implant or restorative components are reached and breakdown occurs resulting in material failure.

Dr. Murray Arlin, D.D.S., dip Perio, F.R.C.D.(C) received his D.D.S. from McGill University in 1977. Cutting Edge Techniques and Materials to Maximize Success of Posterior Composite Resin Restorations

Dr. Amin Babul graduated from the Faculty of Dentistry at University of Toronto in 1994. He proceeded to further his training when he was selected for a Dental Internship at Sunnybrook Hospital. He received additional training in Oral Medicine, Oral Surgery and Anaesthesia. Dr. Babul has a solo practice in the city of Toronto in a working class neighbourhood. Over the last 15 years of practice, his focus has been to provide care for his patients in all areas of Dentistry especially in Orthodontics, Endodontics and Implants. Due to the demographics of his practice, Dr. Babul has had to become proficient
New Evolution in Implant Overdenture Therapy

Edentulous or soon-to-be edentulous patients require dental implants for stability and retention. For many years locators were the main treatment option for removable prosthesis. Locators are better than no treatment, but patients often complained of instability with locators along with the costly maintenance associated with the changing of the nylon inserts. The fixed-removable overdenture solution has eliminated both problems and provides a rigid fixed prosthesis that is removable.

The fixed removable overdenture solution also allows the surgeon to “follow the bone” and place implants into solid bone without concern for parallelism. The tipping of distal implants in fixed cases creates increased anterior to posterior spread with decreased cantilevers with more functioning teeth within the prosthesis. This same surgical technique can be incorporated into this new overdenture surgical procedure. A one stage procedure allows for extractions, bone reduction, implant placement along with healing collar all at one time. Within 8 -10 weeks, patients are ready for impressions.

Dr. Lorenzo Vigna was born and raised in Toronto. He graduated with Honours from the University Of Toronto Faculty Of Dentistry. Dr. Vigna completed his Oral and Maxillofacial Residency at Sinai Hospital of Detroit, University of Detroit, in 1995. Dr. Vigna has a practice in St. Catharines, Ontario. Dr. Vigna is the Chief of Oral and Maxillofacial Surgery and also the Lead for Dental Service for the Niagara Health System. Dr. Vigna is also an Assistant Clinical Professor of Surgery with McMaster University and teaches E.N.T. residents in both his private clinic and the hospital. Dr. Vigna is a member of multiple associations including the Michigan Chalmers J. Lyons Academy of Oral and Maxillofacial Surgeons. Dr. Vigna is one of the leading clinicians in Canada for DentsplySirona and the Conus treatment concept.
Fadi Touma, RDT, CDT is a 1994 graduate of Ferris State University (Dental Technology program). He worked in a prosthodontic specialty office from 1994 to 2001. In 2001, he started his own specialty laboratory focusing on full mouth reconstruction, implants and cosmetic dentistry. He has extensive implant knowledge and experience with most implant systems. Mr. Touma holds an American certification in addition to his Canadian registration. He is currently the DENTSPLY Implants District Sales Manager and Technical Advisor for the Eastern and Atlantic regions of Canada.
