Concepts Covered

Lectures: 8:30AM to 12:30PM

- Diagnosis
- Patient management
- Pain control
- Fundamentals of rotary instrumentation
- Latest in reciprocation techniques

- State of the art carrier-based obturation

Hands-On: 1:30PM to 4:30PM

- Hands-on instrumentation and obturation

Course Outline (Course Code: 070)

This course will teach you which cases to treat predictably, and which cases to refer out for proper management. It introduces you to the fundamental concepts in rotary endodontics, regardless of the system you currently use. It will discuss diagnostic skills you should have to properly zero in on the patient chief complaint.

This course will reinforce the SOAP concepts in achieving proper diagnosis, and assess case difficulty and learn when to treat and to refer. Review local anesthesia techniques to help you achieve proper pain control. Cover and detail proper handling of endodontic procedure from isolation to access, canal location, instrumentation, disinfection and obturation details.

The course objectives will be for GPs to become confident in diagnosis, anesthesia, anatomy, instrumentation, irrigation and obturation.

The hands-on component will involve various Tulsa rotary systems and products.

Dr. Rony Dagher is an Endodontist and a fellow with Royal College of Dentist of Canada who maintains a private practice in Mississauga, Ontario, Canada.

He is a graduate from University of Toronto with a Bachelor of Science degree. He attended Case Western Reserve University where he graduated with a DDS.

He attend Toronto General Hospital surgical residency program and practiced general dentistry for 7 years prior to enrolling and completing a specialty master's degree in endodontics at the University of Toronto.

Dr. Dagher has served as an instructor at both the undergraduate and graduate endodontic department at the University of Toronto. He is currently on the board of endodontic examiners for the Royal College of Dentist of Canada.
