What is PRF (Platelet Rich Fibrin); A matrix concentrate of autologous platelets, leukocytes and fibrin. Gain predictable regeneration and accelerated healing for an overall increase of treatment success with our course in PRF applications to various implant surgical procedures.

Better Healing

Predictable grafting

Subjectively less pain

Course Outline:

- History of blood-based biologics and their use in dentistry
- What is PRF?
- Lecture about historical development of PRF and modifications to its protocol.
- Clinical Applications
- Lecture about phlebotomy
- Hands-on component to train the dentist and his/her staff on collection of blood and **manufacturing PRF**

Dr. Waji Khan attended the University of Toronto, Trinity College and graduated with a Bachelor of Science. He then attended The University of Toronto Faculty of Dentistry and graduated with his Doctor of Dental Surgery in 2001. Dr. Khan served as a dental officer in the Canadian Forces from 1998-2007. After a ten year career in the Canadian Forces, he then moved to Kingston with his wife and life partner Dr. Sohela Vaid in 2007 to pursue studies in Medicine and practice Dentistry.

Dr. Mark Bishara has a practice focused on but not limited to implants, bone grafting material regeneration, and tissue regeneration in Bowmanville, ON, Canada. He is the founder of the Canadian Implant Dentistry Network (CIDN) and collaborates with members of the Miron Lab, with a focus on tissue regeneration utilizing PRF. He is a published author on topics such as PRF, soft tissue grafting and immediate implants. He can be reached at bbishara6@gmail.com
